Key

AG	Above Ground	HDPE	High Density Polyethylene
BG	Below Ground	MDPE	Medium Density Polyethylene
SRC	Steel Reinforced Concrete	PE	Polyethylene
GRC	Glass Reinforced Concrete	PP	Polypropylene
SS	Stainless Steel	L	Litres
F	Fibreglass	hr	Hour

Comments

- For above ground installations, a not oil-emulsifying pump must be used with this infrastructure. Vortex type pumps and standard rpm helical rotor type pumps are considered to be oil-emulsifying pumps and are not authorised for use with this infrastructure (Joint Committee Approval No. 96-0030 and 96-0031).
- Additional pre-treatment: Infrastructure is designed to also remove heavy metals, neutralise acidic wastes and disinfect.
- Related standard products: Skimmer device and 500 litre waste oil and solids storage tanks
- The diaphragm pump must be used with this infrastructure. Vortex type pumps and standard rpm helical rotor pumps are considered oil-emulsifying pumps and are not authorised for use with this infrastructure. Pump rate must not exceed the pre-treatment devices rated treatment capacity

Unitywater ISO certifications:

OH&S ISO 45001 | Environmental ISO 14001 | Quality ISO 9001 | Food Safety ISO 22000 | NATA Laboratory ISO 17025
