

# Plastic Pairing

**INSTRUCTIONS:** One of the easiest ways you can help the environment is by choosing reusable options over single-use plastic. Ready to test your knowledge? Draw a line from the single-use plastic option on the left to its earth-saving reusable replacement on the right!

Colour me in!

## Did you know?

One of the reasons it's so important to reduce plastic waste is because of microplastics. These are very small pieces of plastic that make their way into our waterways and oceans and are harmful to the environment and animals.
