Position Purpose

The Technology Strategy & Architecture section is part of the Technology branch which is responsible for the 'Plan to Design', 'Implement to Handover' and 'Maintain to Renew' phases of the Technology lifecycle. The section works with business stakeholders to identify process improvements and translate business requirements into system changes and enhancements and to ensure strategic alignment.

In this position you will provide high quality information, guidance and advice to the Technology Strategy & Architecture Manager on Technology operations, process and technology. As the Enterprise Architect you will be responsible for ensuring the Enterprise Architecture function is aligned to the needs and strategy of the business.

This position reports to the Enterprise Architect Practice Lead and works closely with all key stakeholders within the Technology branch.

Position Accountabilities

Key functions of the role include:

The role of the Enterprise Architect is to build a holistic view of the organisation's strategies, processes, information, and Technology assets, ensuring the business and Technology are in alignment. Key functions of the role include:

- Assesses and communicates the impacts, trade-offs, risks, costs, benefits, and opportunities of technology solutions.

- Aligns and streamlines business processes, technology, and business strategy.

- Develops and implements strategy for reducing complexity of information systems in a cost-effective manner, for example, by decreasing the number of applications or moving away from legacy systems.

- Establishes appropriate measures, metrics and monitoring of systems within the business to clarify effective technology performance.

- Builds working relationships with industry, business service partners and strategic vendors to identify opportunities to assist and promote Unitywater.

- In alignment with Unitywater's corporate strategy and operational drivers, develop target enterprise architecture and transition plans that help to define the Technology program of work and guide technology investment decisions.

- Develop end to end enterprise architecture inclusive of all architecture domains aligned with Enterprise and Solution Architecture Frameworks to support business case development, Technology procurement, implementation, and production support.

- Develop comprehensive strategy responses, briefs, submissions, presentations, reports and information papers to influence the development of enterprise architecture and related project, Technology planning and investment issues and decisions.

- Develop and review architectural blueprints, roadmaps, standards, and directions; conduct feasibility studies and options analyses.

- Provide advice to Technology stakeholders on technology trends and industry best practice to influence the effectiveness of the organisation's business and Technology systems.

- Maintain an awareness of organisational drivers, coordinating the promotion, development, acquisition and implementation of Technology systems and services.

- Undertake high level research, horizon scanning and analysis to identify future Technology trends, and assess applicability to support business objectives Identify and assess new and emerging technologies, products, methods, and techniques to determine the likely relevance for the organisation.

- Develop and manage Technology stakeholder groups, including senior management and Technology professionals, to facilitate open communication, capture and disseminate business and technical information to stakeholders.

- Develop trusted partner relationships with Executive Managers and Branch Managers providing consultation, insight and facilitating definition of high value business activities and outcomes.

- Prioritise, negotiate, and manage resource and work schedules to support project and operational work to meet deadlines and achieve desired outcomes.

- Ensuring that what is delivered is innovative, fit for purpose, adheres to architectural and functional standards, and aligns to defined scope.

- Participate in Unitywater safety audits and inspections to demonstrate visible safety leadership and participation.

- Such other relevant duties as required from time to time which would generally fall within the skill and knowledge requirements for this position.

- Support and role model the WH&S policies, procedures, and practices of Unitywater as amended from time to time.

- Participate in Unitywater safety audits and inspections to demonstrate visible safety leadership and participation.

- Such other relevant duties as required from time to time which would generally fall within the skill and knowledge requirements for this position.
